ABSTRACT & CERTIFICATION

TITLE: The Recreational Affects Of The COVID-19 Pandemic

Name: Cristian Pappan

School: Hermosa Middle

Grade Level: 7th

Type the Body of Your Abstract Here (250 Word Maximum)

Did 80 percent of people I have surveyed significantly change their day to day recreational activities? In the beginning I said No, 80 percent of people surveyed did not change their daily recreational activities because from my experiences I have found that people don't tend to have many recreational activities they participate in or at least most of the people I have met. To test this I created a survey that had quest that asked about the activities they participated in before the pandemic hit and also how it was changed because of everything closing, as well as their attitudes towards this and also how active they have become. When I got the results the majority (55 percent) of people said that the covid-19 pandemic extremely affected their lives in the recreational sense and a majority (80 percent) of people said that they have become less active and less motivated to do there work and to stay healthy and active. All in all I've learned that my experience were very uncommon and the COVID pandemic has really affected everyones lives whether it was severely or it was just a little bit and but we all got through it and the majority of people are indeed affected by the pandemic

1. The student independently performed all procedures as outlined in this abstract Yes No
2. This project is a continuation. Yes No
3. This project is being presented at SJRSEF NMJAS Paper Competition

I hereby certify that the above statements are correct and the information provided in the Abstract is the result of one year's research. I also attest that the above properly reflects my own work.
