

SAN JUAN NM REGIONAL SCIENCE & ENGINEERING FAIR

JUNIOR AND SENIOR DIVISION

ABSTRACT & CERTIFICATION

TITLE: Are you Bready for Some Mold?

Name: Dominique Henderson

School: Navajo Preparatory School

Grade Level: 9th Grade

Type the Body of Your Abstract Here (250 Word Maximum)

This science project was done to figure out what bread would mold the fastest with liquids that were put on the bread. My hypothesis was that if I moistened the bread with sugary drinks, I think the mold will like the one with the most sugar and it will grow faster. The experimental results did not support my hypothesis because no mold was growing on any of the eighteen breads I had used. My data also shows that the days were almost completely the same while I checked throughout each day.

1. The student independently performed all procedures as outlined in this abstract Yes No
2. This project is a continuation. Yes No
3. This project is being presented at SJRSEF NMJAS Paper Competition

I hereby certify that the above statements are correct and the information provided in the Abstract is the result of one year's research. I also attest that the above properly reflects my own work.
